

DIGITAL THEATRE+

Name: Missey Head

Role: Immediate-Past President of the Texas Educational Theatre Association, Assistant Director of Fine Arts, Lewisville Independent School District

“

In short, Digital Theatre+ provides the theatrical experiences I longed for my students to know existed. I cannot believe I taught for 28 years without this type of tool. Because of the efforts of this company, students who have never seen or had access to professional theatre now have the occasion to experience real magic in a way they never imagined was possible. Our administration, teachers, and students cherish and depend upon this resource. It is for this reason I have become extremely passionate about this company, and I want to share this valuable tool with you.

Digital Theatre+ captures live performances using unique camera angles and high-definition technology production quality productions for an online global audience. The platform includes an enormous catalog of live performances complete with lesson plans, study guides, and interviews with the actual directors, actors, and designers associated with the productions.

**“I cannot believe
I taught for 28
years without this
type of tool.”**

Lewisville ISD, along with other school districts in the state, adopted Digital Theatre+ as one of our textbooks. Our teachers and students feel blessed to have the resources this company provides. We are receiving rave reviews from students regarding the quality and value of these productions. The content provides multiple opportunities for our students to develop their skills in critical, logical, reflective, metacognitive, and creative thinking, and the visual references these productions provide play a critical role in providing our students with the ability to develop their acting skills and techniques. Acting and technical students alike are extremely interested in the interviews with the directors, actors, and designers. Technical resources such as these are sorely limited in educational theatre and our tech students see this resource as an important component to furthering their understanding of the world of technical theatre. Digital Theatre+ truly provides real life examples of what is possible and how to achieve the unimaginable.

I know there are deserving students and teachers who will benefit from this resource and who need this resource to complete and augment their theatre education. I feel compelled to shout from the rooftops to all who will listen that Digital Theatre+ is a must...a necessity.
